Accent Color	#AA1351
Design Style	Swiss Editorial

How to Use This Document

This visual guideline system is designed to maintain consistency across all ROWAPA touchpoints while allowing flexibility for different content types. Each section includes specific examples, technical specifications, and implementation guidelines.

For print or PDF sharing: Use your browser's print function (Cmd/Ctrl + P) and select "Save as PDF" with background graphics enabled.

Color Palette

PRIMARY COLORS

Manganese Black
#1D3149

Great Serpent
#486EA3

Sea Cliff
#A0C4DF

Plum Perfect
#AA1351

NEUTRALS

White
#FFFFFF

Pastel Snowbank
#E8E9E9

Design Principles

Swiss precision meets modern corporate editorial design

Structure over Decoration

Let content hierarchy and spatial relationships create visual interest.

Minimal Graphic Elements

Use geometric accents sparingly and with clear purpose.

Prioritize Clarity

Every design decision should enhance communication, not distract from it.

Consistent Spacing System

Maintain rhythmic spacing to create visual harmony across all materials.

Editorial Tone

Approach design with the precision of editorial publishing.

Photography Guidelines

REQUIRED

- Authentic, natural people
- Candid, professional moments
- Soft natural light
- Neutral office backgrounds

AVOID

- Exaggerated smiles or sales-like expressions
- Heavy shadows or dramatic lighting
- Stock photography clichés
- Childish or overly graphic treatments

5.1 Photography Direction

VISUAL MOOD

ROWAPA visuals must communicate:

- Clarity
- Authority
- Structured thinking
- Human insight
- Professional confidence

The tone must feel:

- Editorial
- Natural
- Authentic
- Calm
- Never "salesy"
- Never exaggerated

AVOID

- × Over-smiling stock photos
- × Artificial handshakes
- × Forced teamwork poses
- × Overly dramatic lighting
- × Childish collage effects

5.2 Light & Color Treatment

LIGHTING

Preferred lighting:

- Soft natural daylight
- Neutral office light
- Even exposure
- No harsh shadows
- No overly warm/yellow filters

Mood reference: Swiss precision, clean corporate editorial.

COLOR TREATMENT OPTIONS

Choose ONE consistent approach per campaign:

Option A – Natural Editorial

- Slight desaturation (5–15%)
- Neutral tones
- Balanced contrast

Option B – Soft Duotone Overlay

- Overlay Manganese Black (#103149) at 20–35% opacity
- Or Sea Cliff (#A0C4DF) subtle overlay
- Keep faces natural and readable

Avoid:

- × Strong Instagram filters
- × Over-saturated blues or magentas
- × High contrast dramatic edits

5.3 Composition Rules

CROPPING

- Use mid-shots and close-ups
- Focus on gestures, expressions, eye contact
- Avoid overly wide empty meeting rooms
- Avoid generic conference shots

PREFER

- People in conversation
- Focused thinking moments
- Presentation scenes with engagement

5.4 Integration of Brand Graphic Elements

Your decorative diagonal system is a strong asset. It should not overpower photography but frame it.

HOW TO USE THE DIAGONAL ELEMENTS

Corner Anchors

- Place diagonal brand element in one corner (top-right or bottom-left)
- Use at 60–80% opacity
- Keep scale minimal and elegant

Frame Extension

- Let the diagonal enter from outside the frame
- Use it as directional movement across the image
- Never center it

Subtle Overlay Divider

Accent Edge

RULES FOR GRAPHIC ELEMENTS

- Maximum 2 decorative elements per image
- Always prioritize readability
- Maintain strong negative space
- Use brand angles consistently (no random shapes)

5.5 Differentiation System for Blog & Product Pages

To avoid generic repetition:

Blog Articles

- Use natural editorial photos
- Apply subtle duotone or diagonal accent
- Use color variation in accent line per category

Product Pages

- Use more structured compositions
- Optional cut-out subject on neutral background
- Slightly stronger graphic framing

CATEGORY DIFFERENTIATION THROUGH BACKGROUND COLOR LOGIC

Example system:

Leadership	Sales	HR / Performance	Corporate
Great Serpent	Plum Perfect accent	Sea Cliff	Manganese Black dominant

5.6 Image Sources & Keywords

RECOMMENDED PLATFORMS

Unsplash | Pexels | Adobe Stock

SUGGESTED SEARCH KEYWORDS

For natural editorial look:

candid business meeting · corporate training workshop · executive coaching session · diverse professionals discussion · consultant presentation real · authentic corporate portrait · focused professional thinking · minimal office environment

AVOID KEYWORDS

- × success handshake
- × smiling team thumbs up
- × corporate success concept
- × business stock smiling group

5.7 AI-Generated Image Option

If stock photography does not meet quality expectations, AI-generated imagery can be used — provided it follows the same editorial tone and realism.

INTRODUCTION COPY (FOR CLIENT)

You can include this paragraph inside the guideline document:

> To maintain a distinctive and consistent visual identity, ROWAPA may also use AI-assisted image generation when suitable stock photography does not meet the desired editorial tone. AI-generated visuals must remain realistic, natural, and aligned with the brand's professional and structured aesthetic. The goal is not to create artificial or stylized imagery, but to enhance authenticity and visual differentiation.

EXAMPLE AI PROMPT STRUCTURE

Use prompts like:

```
"Natural editorial photograph of a professional consultant presenting in a modern Swiss office, soft daylight, neutral tones, authentic expressions, minimal background distraction, corporate but not salesy, realistic photography, high detail."
```

```
"Candid moment between two executives in discussion, modern minimal office, soft light, natural color grading, documentary style, professional atmosphere."
```

AVOID

- × hyper-realistic
- × fantasy corporate
- × dramatic cinematic lighting
- × ultra glossy commercial

5.8 Final Principle

ROWAPA visuals must feel:

Structured. Confident. Human. Intelligent.

- Graphic elements enhance clarity.
- Photography provides authenticity.
- Together, they create visual authority.

1. Blog Header System

Full-width images with optional duotone treatment, minimal geometric accents, and left-aligned headlines. Each header maintains visual consistency while allowing distinct variations.

2. Product Page Visual System

Cropped portraits with varied background colors, clean typography, and minimal geometric overlays. Each product is visually distinct through background variation while maintaining system cohesion.

Executive Coaching

Strategic guidance for senior leaders navigating complex organizational challenges and driving sustainable transformation.

LEARN MORE

Team Development

Building high-performing teams through evidence-based practices and collaborative methodologies tailored to your organization.

LEARN MORE

Change Management

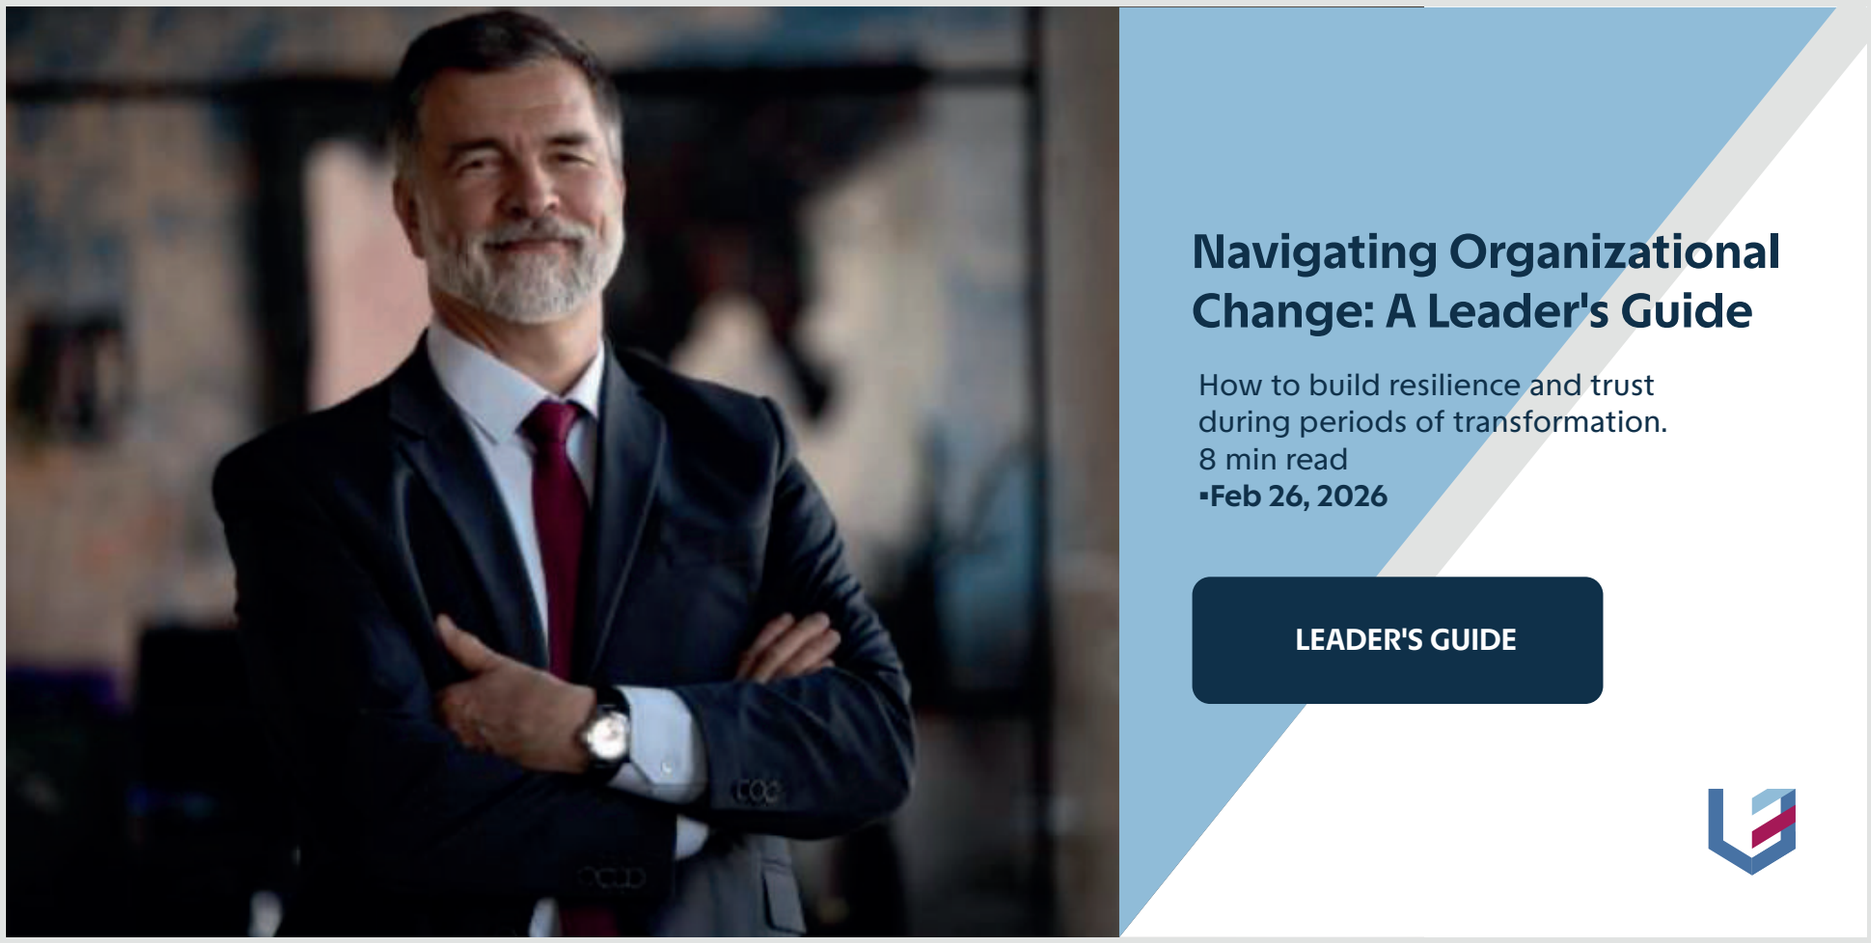

Comprehensive support for organizational transitions, ensuring smooth implementation and sustained employee engagement.

LEARN MORE

3. LinkedIn Event Post Template

Authentic event photography with clean typography overlay. Optional speaker portraits and breathable composition ensure professional presentation without excessive visual clutter.

4. LinkedIn Carousel System

Multi-slide format with strong opening slide, clean two-column layouts, and intentional white space.
Minimal graphic accents maintain professional editorial tone throughout.

5 Principles of Effective Team Leadership

Slide 1 of 6

1. Clarity of Vision

Great leaders articulate a clear, compelling vision that aligns team efforts and inspires commitment toward shared objectives.

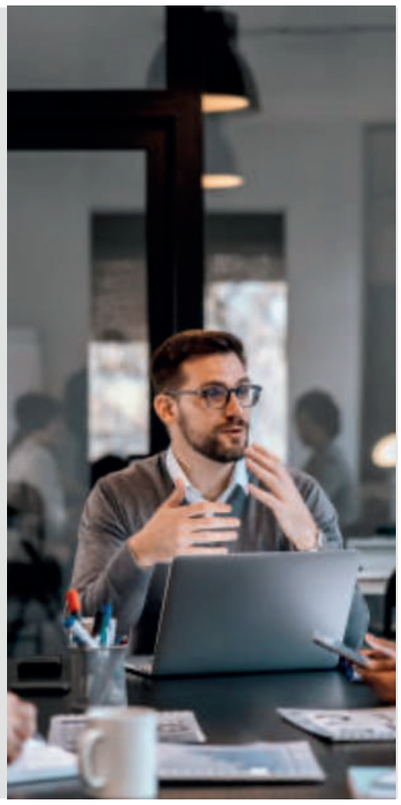

ROWAPA

Slide 2 of 6

2. Active Listening

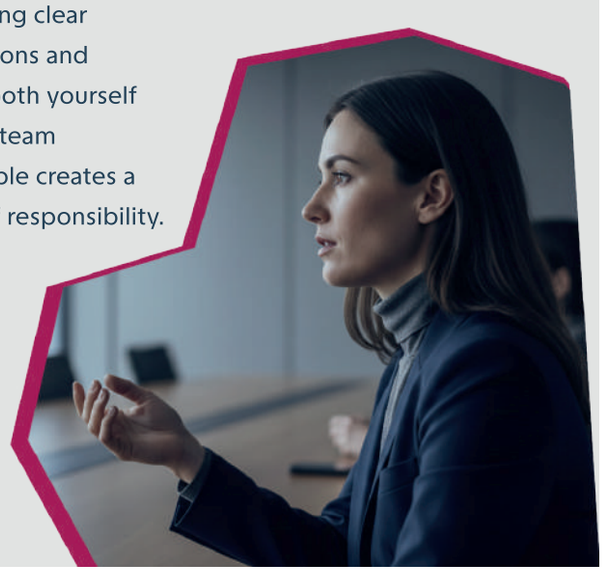

Understanding begins with genuine listening. Leaders who actively engage with team input build trust and foster innovation.

Slide 3 of 6

3. Accountability

Establishing clear expectations and holding both yourself and your team accountable creates a culture of responsibility.

Slide 4 of 6

4. Continuous Development

Invest in ongoing learning and growth opportunities. Strong teams are built through consistent skill development.

Slide 5 of 6

5. Adaptive Resilience

Navigate change with flexibility while maintaining core values. Resilient leaders help teams thrive through uncertainty.

Branded Visual Compositions

Six premium layouts demonstrating photo + graphic integration using ROWAPA's diagonal system. Each composition includes light and dark variants.

1. LinkedIn Event Post `1200 × 628`

Photo placement: Right 60% | Diagonal band: Top-left to mid-right | Category tag: Top-left corner

LIGHT VARIANT

DARK VARIANT

2. LinkedIn Carousel Slide `1080 × 1080`

Photo placement: Top 55% full bleed | Corner accent: Bottom-right | Number label: Top-left

LIGHT VARIANT

DARK VARIANT

3. Blog Header (Full Bleed) `1600 × 900`

Photo placement: Full bleed with gradient overlay | Diagonal accent: Bottom-left | Category tag: Top-left

LIGHT VARIANT

DARK VARIANT

4. LinkedIn Insight Post `1200 × 1200`

Photo placement: Left 45% cropped angle | Diagonal divider: Center | Quote area: Right side

LIGHT VARIANT

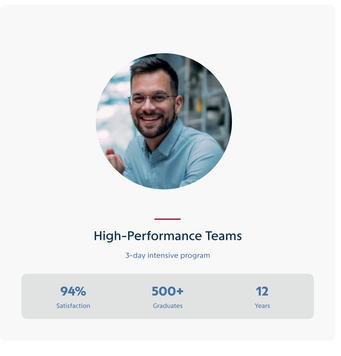

DARK VARIANT

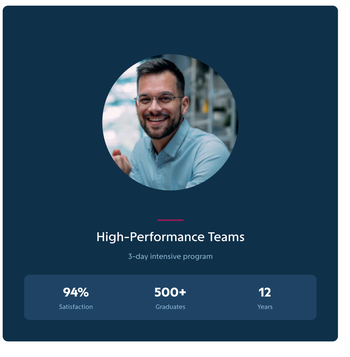

5. Training Program Highlight `1080 × 1080`

Photo placement: Circular cutout center | Corner accents: Top-right diagonal | Stats overlay: Bottom

LIGHT VARIANT

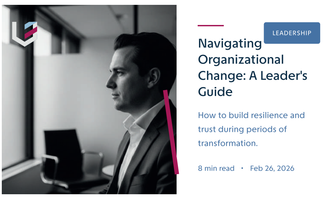

DARK VARIANT

6. Blog Header (Split Layout) `1600 × 900`

Photo placement: Left 50% | Diagonal transition: Center | Content: Right 50%

LIGHT VARIANT

DARK VARIANT

Implementation Notes

PHOTO TREATMENT

- All photos use subtle navy overlay (15–25% opacity) for cohesion
- Maintain authentic expressions and natural lighting
- Avoid cropping faces; focus on gestures and engagement

GRAPHIC ELEMENTS

- Maximum 2 decorative elements per composition
- Diagonal angles between 8–25° for consistency
- Use Plum Perfect (#AA1351) as accent only, not dominant color

Event Announcement Compositions

Three LinkedIn event designs (1200×1200) with single-photo and two-photo variants. Each uses ROWAPA's diagonal ribbon as the signature element.

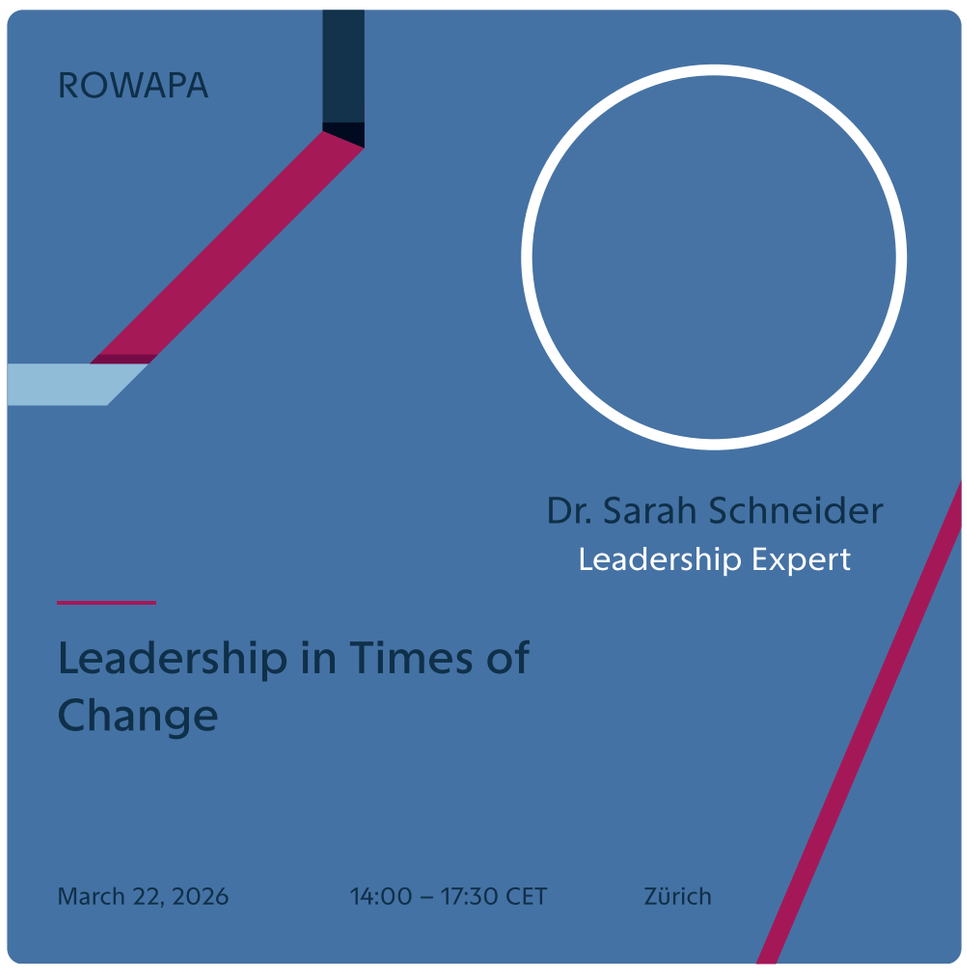

Design 1: Diagonal Split Layout

Large diagonal ribbon divides content zones. Title overlays photo, details in clean white space.

VERSION A — SINGLE PHOTO

VERSION B — TWO PHOTOS (SPEAKER + EVENT)

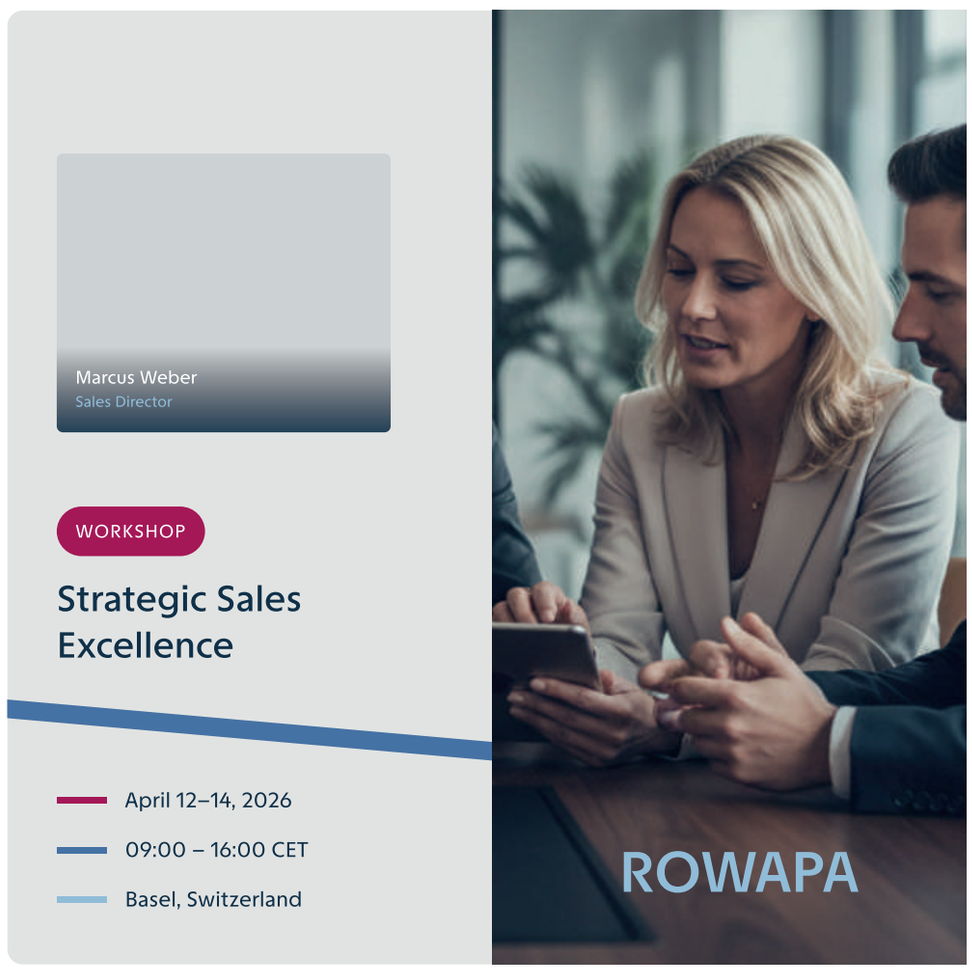

Design 2: Horizontal Ribbon Layout

Strong horizontal diagonal ribbon cuts across composition. Photo on right, content on left.

VERSION A — SINGLE PHOTO

VERSION B — TWO PHOTOS (SPEAKER + EVENT)

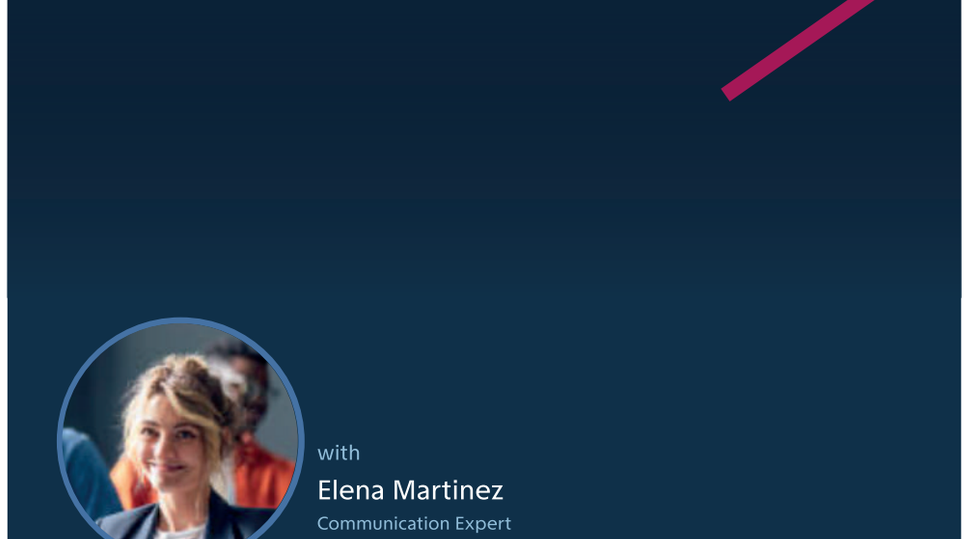

Design 3: Dark Premium Layout

Navy background with corner diagonal ribbon. Photo centered or paired with portrait.

VERSION A — SINGLE PHOTO

VERSION B — TWO PHOTOS (SPEAKER + EVENT)

Event Announcement Guidelines

DIAGONAL RIBBON

- Only ONE diagonal element per design
- Use as signature branding element
- Rotate between 5° and 35° max

PHOTO TREATMENT

- Speaker photos: circular or rectangle
- Event atmosphere: subtle overlay for cohesion
- Never crop speaker faces

TYPOGRAPHY HIERARCHY

- Event title: largest, most prominent
- Date/time/location: consistent format
- Speaker names: secondary hierarchy

Replicating in Canva

This system is designed to be easily replicated using Canva's standard features

Color Setup

1. Create a custom color palette in Canva
2. Add all 6 brand colors exactly as specified
3. Save as "ROWAPA Brand Colors"
4. Use only these colors in all designs

Templates

1. Create master templates for each system
2. Lock background elements
3. Leave text and images editable
4. Duplicate templates for variations

Geometric Accents

1. Use Canva's basic shape tools (rectangle, line)
2. Keep accent elements simple
3. Use diagonal lines at 45° angles
4. Maintain consistent stroke weights (1-2px)

Image Treatment

1. Apply B&W filter: Reduce saturation to 0-40%
2. For duotone: Add color overlay at 20-40% opacity
3. Crop images intentionally
4. Maintain consistent image dimensions

Typography

1. Use clean sans-serif fonts (Helvetica, Inter, or similar)
2. Limit to 2-3 font sizes per design
3. Maintain consistent line heights
4. Use uppercase sparingly for labels

Spacing System

1. Use 8px base unit (8, 16, 24, 32, 48, 64)
2. Apply consistent padding in templates
3. Maintain generous white space
4. Align elements to grid

Quick Start Checklist

- [ ] Set up custom color palette
- [ ] Choose approved typography
- [ ] Create master templates
- [ ] Source authentic photography
- [ ] Define spacing grid
- [ ] Test templates with real content
